

norseenergy.co.uk

A specialist energy and carbon consultancy

With rising energy prices, uncertainty about fossil fuels and changing legislation regulating carbon emissions, there has never been a better time to work with us.

Norse Energy provides a comprehensive range of professional services, together with innovative energy and carbon reduction solutions for clients in both the private and public sector across the UK.

We have the passion and expertise to improve the energy efficiency and reduce the running costs of your property portfolio.

Highly qualified staff

As a dynamic facilities management and property consultancy company, we bring together highly qualified and experienced energy specialists to offer an unrivalled in-house service to our customers.

Solutions to suit you

Choose a fully integrated energy consultancy service or simply select individual solutions to suit the scope and scale of your project. In some cases we can even introduce funding options to unlock specific projects that would otherwise be unable to progress.

A comprehensive range of services

Here's an outline of what we do. For more detail, visit www.norseenergy.co.uk

Feasibility and design

- Environmental engineering / water management
- Low carbon design including zero carbon standardised solutions and innovative fabric and M&E services design
- Sustainability consultancy.

Compliance and monitoring

- Carbon Reduction Commitment (CRCEES) administration and monitoring
- Display Energy Certificates (DECs) and Energy Performance Certificates (EPCs)

Improve and manage

- Energy audits ranging from a general overview to complete forensic report standard
- Energy and carbon reduction strategies
- Energy efficient leasing packages for schools
- Renewable energy technologies and revenue generation
- Client or joint venture funded energy generation and energy efficient solutions
- Funded turnkey solutions for energy efficiency and carbon reduction
- Shared community or district energy platforms.

Start saving money

It's time you only paid for the energy you actually need - not what your buildings currently demand. We can be with you every step of the way to help make this happen.

Whatever stage your project is at, we can draw upon a nationwide resource of professionals and specialists to make sure you have the right people around you for your energy scheme.

We have a proven track record of working with clients in the education, government, community and housing sectors. We also understand the budget and time pressures which drive decision making and planning for commercial companies.

So why not get in contact and find out how our wide range of energy solutions could work for you?
